EXPERIENCE

Senior Lead Software Engineer

Greencard Payments

- 📅 2024 📍 California, United States
- Led and managed both PHP/Laravel and React.js development teams for fintech-based applications.
- Designed, developed, and maintained secure ACH payment processing systems and NACHA file generation workflows.
- Worked on fintech solutions involving payment automation, transaction processing, and banking integrations.
- Coordinated project planning, task allocation, code reviews, and deployment processes across multiple teams.
- Collaborated with stakeholders, designers, and developers to deliver scalable and high-performance applications.
- Developed and maintained REST APIs and integrated third-party financial services and payment gateways.
- Improved system performance, security, and scalability for payment-related platforms.
- Mentored junior developers and established development standards and best practices.
- Managed production deployments, bug fixing, and ongoing platform maintenance.

Software Developer

Nardagani Reading Program

- 📅 2023 - 2024 📍 Remote
- Develop interactive language learning platform using Unity frontend with Laravel backend for immersive phonics-based education
- Implement AI-driven personalized lesson plans with real-time progress tracking and multi-user learning support
- Integrate secure payment gateways for subscription-based learning modules and premium content delivery
- Optimize high-performance data processing, ensuring smooth synchronization between Unity and Laravel backend
- Build cross-platform responsive interface enabling seamless course access across devices

Lead Software Engineer

Upwork (Top-Rated Freelancer)

- 📅 2020 - Present 📍 Remote
- Achieved Upwork Top-Rated status with 70+ completed projects, 5-star feedback, and 100% job success rate
- Lead full-stack development for diverse global clients, delivering custom PHP, Laravel, CodeIgniter, and Vue.js solutions
- Architect and implement scalable SaaS platforms with microservices architecture serving thousands of concurrent users
- Build and integrate RESTful APIs connecting applications with external services, including payment gateways, hotel booking systems, and communication platforms
- Develop PayGreenCard, a secure digital payment platform with 2048-bit encryption, fraud detection, and real-time transaction processing handling high-volume payments
- Create Teamery, a smart team performance and collaboration platform with real-time updates and advanced analytics
- Implement complex integrations with 18+ hotel APIs (TripAdvisor, Booking.com, Tourico) using Elasticsearch for optimal performance

SUMMARY

Sr. Full Stack Developer with 13+ years of experience building high-performance SaaS platforms, scalable microservices, and real-time web applications. Expert in PHP, Laravel, CodeIgniter, Node.js, React.js, and Vue.js with proven ability to architect enterprise-level solutions. Upwork Top-Rated Plus Freelancer with 70+ completed projects and 100% job success rate. Strong technical leader experienced in managing cross-functional teams, delivering production-grade applications, and implementing complex integrations including VOIP systems, payment gateways, and third-party APIs. Specialized in database optimization, big data management, and building secure, scalable solutions for global clients across diverse industries

Bachelor of Science in Computer Science

University of Sargodha

📅 09/2008 - 10/2012 📍 Sargodha, Pakistan

SKILLS

Languages & Frameworks

PHP	Laravel	CodeIgniter
Symfony	Zend	Node.js
Express.js	JavaScript	

Frontend Technologies

React.js	Vue.js	Angular
Livewire	HTML5	CSS3
Tailwind CSS	Bootstrap	

Backend & APIs

RESTful APIs	SOAP APIs
GraphQL	
Microservices Architecture	WebRTC
Socket.IO	

EXPERIENCE

Full Stack Developer & Product Manager

Dev & Design

- 05/2022 - 12/2023 📍 Lahore, Pakistan
- Led product development from concept to launch, defining and executing a comprehensive product strategy
- Managed cross-functional teams ensuring clear goals, high performance, and timely project delivery
- Developed core product logic and supervised execution, including big data management for enterprise clients
- Ensured UX design excellence and quality assurance across all product deliverables

Web Team Lead & Product Manager

MillionTel FZ-LLC

- 03/2019 - 04/2022 📍 Dubai, UAE
- Led development of VoIP traffic management switch (Numbers Stats), managing trillions of call duration records with comprehensive CDR reporting
- Built bulk SMS routing management switch (SMS Stats) handling trillions of SMS records with real-time EDR reports
- Architected white-label and reseller management system with super admin capabilities and traffic monitoring
- Managed multiple databases with synchronization for 360-degree reporting and cross-domain session management
- Implemented run-time SIM card switching and SMPP box management for optimal SMS delivery
- Developed payment systems and deep crystal reports for financial tracking and analytics

Web Team Lead & Product Manager

INT Communication Limited

- 02/2018 - 10/2019 📍 Lifford, UK
- Led product development strategy and managed cross-functional development teams
- Built Minutes Report, a bulk VoIP traffic reseller and white-label management switch with comprehensive reporting
- Developed Consulting Centrale platform managing millions of consultants with audio/video calls using WebRTC + Twilio
- Implemented Elasticsearch for high-performance search and data retrieval across large datasets
- Created microservices architecture for mobile apps (Android & iOS) ensuring scalability and maintainability

Web Development Team Lead

Flattechs (Pvt.) Ltd

- 11/2015 - 01/2018 📍 Lahore, Pakistan
- Led team of 5 developers achieving 30% increase in efficiency and 98% on-time project delivery rate
- Developed Arabian Eagle International, online hotel and flight booking system with 18+ live hotel API integrations
- Built Business2Sell and CommercialProperty2Sell platforms managing millions of listings with advanced search capabilities
- Created Ashako classified platform with auction system, microservices for mobile apps, and Elasticsearch integration
- Designed websites with performance optimization resulting in 25% enhancement of user experience and faster load times
- Implemented agile methodologies leading to 20% increase in productivity and improved project adaptability

SKILLS

Databases

MySQL	MongoDB	Firestore
PostgreSQL	Database Optimization	
Big Data Management		

Cloud & DevOps

AWS	S3	Route 53	EC2
Google Cloud Platform		GCP	
DigitalOcean	Vercel	Docker	

Server & Infrastructure

Apache	Nginx	PHP-FPM
Ubuntu	CentOS	cPanel
Hetzner		

Version Control & Tools

Git	GitHub	Postman	VS Code
Composer	npm		
Agile Methodologies			

Integrations

Payment Gateways	Stripe	PayPal
Google APIs	SMPP	Asterisk
VOIP Systems	Hotel APIs	

Data & Analytics

Elasticsearch	Chart.js	D3.js
Data Modeling	Event Threading	
Real-time Processing		

EXPERIENCE

Web Developer

The Next Idea IT Box Limited

📅 06/2012 - 11/2015 📍 Lahore, Pakistan

- Developed Efynd, a homeseller pre-sale repairs platform managing millions of homeowner and service provider records
- Built Spera freelancing platform with gigs system, project management, escrow payments, and earnings tracking
- Created e-commerce solutions including XtremeNutrition with WooCommerce integration across 27 countries
- Implemented payment gateways, security measures, and multi-store management systems
- Developed microservices for mobile applications ensuring seamless cross-platform functionality

AREAS OF EXPERTISE

➤ Full-Stack Development | SaaS Platform Architecture | Microservices Design | Real-time Systems | VOIP Integration | Payment Gateway Integration | Database Optimization | Big Data Management | API Development & Integration | Team Leadership | E-commerce Solutions | Performance Optimization | Agile Project Management | Client Communication

SKILLS

Specialized Systems

SaaS Platforms

E-commerce Solutions

CRM Systems
